RESEARCH EXPERIENCE

"Monopoly in the upstream and strategic technology adoption by the dominant firm in the downstream."	Summer 2023-Present
- Investigating the strategic behavior of downstream firms in a supply chain with an upstream monopolist. - Developed a model illustrating how technologically superior incumbents may strategically underutilize advancements to encourage new market entrants, affecting intermediate goods pricing. - Findings suggest policy implications for social welfare improvements via downstream entry regulation. - Currently expanding the model by introducing new firm strategies and altering timing sequences.
